Op Shop Hop Trail

in the Adelaide Hills Council

Shopping for pre-loved items gives clothes and household treasures another adventure – saving resources, cutting waste and keeping the circular economy moving!

Why Choose Pre-Loved Items?

Choosing pre-loved items is a simple and positive way to care for our environment – and a great way to enjoy a relaxed day out in the Adelaide Hills.

Every item we buy has an environmental footprint. Clothes, toys and household goods take water, energy and raw materials to produce, transport and sell. By choosing pre-loved items, we reduce the demand for new products and make better use of what already exists.

Extending the Life of Everyday Items

Textiles are one of the fastest-growing waste streams. When clothing and household items are thrown away, they often end up in landfill, where they can take many years to break down. Choosing pre-loved items helps keep these materials in use for longer and out of landfill.

Reusing what we already have saves resources, reduces waste and helps lower greenhouse gas emissions. Every pre-loved purchase is a small but meaningful action that adds up across our community.

Supporting a Circular Economy

Op shopping is a great example of the circular economy in action. Instead of the traditional "make, use, dispose" model, a circular economy keeps products and materials circulating for as long as possible through reuse, repair and sharing.

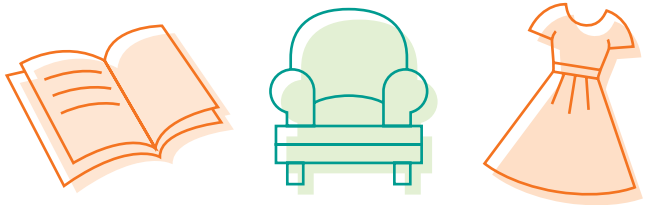

By choosing pre-loved items, you are helping to close the loop – valuing items for their full life, reducing waste and supporting a more sustainable way of living. It's a practical, everyday choice that shows how communities can reduce their environmental impact without giving up quality or enjoyment.

If you would like to learn more about circular economy principles, we encourage you to visit the **Ellen MacArthur Foundation website**.

Make a Day of It in the Adelaide Hills

This Op Shop Trail is also an invitation to slow down and explore the many towns of the Adelaide Hills. As you move between shops, take time to enjoy local cafés, bakeries, parks and main streets. Browse, wander, stop for coffee or lunch, and discover something unique along the way.

Combining pre-loved shopping with local experiences makes for a day that's enjoyable, thoughtful and environmentally responsible.
